

MMM. AKMAL SHARAF

GRADUATE PYTHON ENGINEER | BACKEND DEVELOPER | SOFTWARE ENGINEER

Sri Lanka | akmalsharaf4610@gmail.com | +94769884895 | LinkedIn: [linkedin.com/in/akmal-sharaf-942575234/](https://www.linkedin.com/in/akmal-sharaf-942575234/) | <https://github.com/AkmalSharaf>

PROFESSIONAL SUMMARY

Computer Science graduate with First Class Honours and practical experience in full-stack development, backend programming, application testing, debugging, and technical problem-solving. Currently working as a Full Stack Developer Intern at SLT Sri Lanka, contributing to application development, feature implementation, technical troubleshooting, system validation, and documentation.

Proficient in Python, JavaScript, Node.js, Express.js, React.js, REST APIs, MongoDB, and MySQL, with academic and project experience in Natural Language Processing, machine learning, data processing, and recommendation systems. Experienced in developing web applications, integrating APIs, investigating technical issues, and collaborating within Agile teams. A proactive and analytical problem solver seeking to develop scalable backend systems, data pipelines, and reliable financial technology solutions through Revolut's Graduate Python Engineer Programme.

TECHNICAL SKILLS

Programming Languages:

Python, JavaScript, Java, C++, PHP, .NET

Backend Development:

Node.js, Express.js, REST APIs, API Development, API Integration, Backend Development, Server-Side Programming

Python and Data Processing:

Python Programming, Data Processing, Data Analysis Fundamentals, Machine Learning, Natural Language Processing, scikit-learn, TF-IDF, Cosine Similarity

Databases:

MongoDB, MySQL, Database Management, Data Storage, Database Integration

Frontend Development:

React.js, HTML5, CSS3, Bootstrap, jQuery, Responsive Web Design

Software Engineering:

Object-Oriented Programming, Data Structures and Algorithms, SDLC, Debugging, Application Development, Performance Optimization, Problem-Solving

Testing and Quality Assurance:

Cypress, Selenium, Postman, API Testing, Manual Testing, Test Case Design, Regression Testing, Defect Tracking, Retesting

Tools and Collaboration:

Git, GitHub, Jira, Agile/Scrum, Technical Documentation

Mobile Development:

Flutter

Professional Skills:

Analytical Thinking, Communication, Teamwork, Adaptability, Time Management, Attention to Detail, Continuous Learning

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern - SLT Sri Lanka

March 2026 - Present

- Contribute to application development and feature implementation, supporting frontend and backend functionality.
- Investigate technical issues by analyzing application behavior, identifying potential root causes, and supporting corrective solutions.
- Monitor application activity to identify errors, inconsistencies, and unexpected system conditions.
- Perform structured testing and validation to verify application functionality against defined requirements.
- Support debugging and defect resolution to improve application reliability and minimize disruptions.
- Collaborate with development team members to investigate issues, validate fixes, and complete assigned technical tasks.
- Maintain technical documentation relating to application issues, testing activities, configurations, and resolutions.
- Analyze application behavior and system information to identify risks and potential improvement opportunities.
- Manage multiple development, testing, and troubleshooting tasks while maintaining accuracy and meeting deadlines.

HCL Tech – Process Associate

2024 – 2026

- Supported customers through professional communication and structured issue-resolution processes.
- Monitored online Pearson VUE examination sessions while following established security and operational procedures.
- Observed activity, identified irregularities, and escalated cases according to defined processes.
- Maintained accurate records and documentation while managing multiple responsibilities.
- Collaborated with internal teams to support efficient workflows and issue resolution.
- Developed strong analytical thinking, attention to detail, communication, and problem-solving skills in a high-volume environment.

PROJECTS

AI-Powered Part-Time Job Recommendation Platform for Sri Lanka Using NLP (Final Year Project)

- Developed a web-based job recommendation platform using React.js, Node.js, and MongoDB.
- Implemented Natural Language Processing techniques to analyze job descriptions, user profiles, and preferences.
- Applied TF-IDF and Cosine Similarity to support relevance-based job matching.
- Developed a machine learning model to generate personalized job recommendations.
- Applied data processing techniques to support recommendation functionality and improve user experience.
- Designed application functionality to connect job seekers with relevant part-time employment opportunities.
- Worked with structured data and application logic to support recommendation workflows.

Appointment Management System with AI-Powered Chatbot (Group Project – Quality Manager | Agile)

- Managed quality assurance activities for chatbot and appointment-management workflows.
- Conducted manual testing of frontend functionality and user workflows.
- Performed backend and API testing using Selenium, Cypress, and Postman.
- Logged, tracked, analyzed, and retested defects using Jira.
- Collaborated with developers to investigate issues and validate corrective actions.
- Produced QA reports and dashboards covering test coverage, defect trends, and sprint quality metrics.
- Participated in sprint planning, daily stand-ups, sprint reviews, and retrospectives.
- Supported continuous improvement through structured testing and quality monitoring.

MERN Stack Puzzle Game with External API Integration

- Developed an interactive web application using MongoDB, Express.js, React.js, and Node.js.
- Integrated an external API to retrieve and process game-related data.
- Implemented level-based logic, timers, score tracking, and real-time feedback.
- Worked with API responses and application state to support dynamic functionality.
- Tested API integration, application functionality, and user interaction workflows.

EDUCATION

BSc (Hons) in Computer Science (First Class)

2025

University of Bedfordshire, United Kingdom

Relevant areas:

- Programming and Software Engineering
- Data Structures and Algorithms
- Distributed Service Architectures
- Computer Security
- Research Methodologies and Emerging Technologies
- Database and Application Development

Higher Diploma in IT

2022 – 2024

Sri Lanka Institute of Information Technology (SLIIT), Colombo

Relevant areas:

- Object-Oriented Programming
- Web Application Development
- Data Structures and Algorithms
- Computer Networks
- Computer Security
